***Curved Roof Trusses & Canopies***

***Modern Art Sculptures***

***Entry-Ways & Store Fronts***

***Pedestrian Bridges & Mass Transportation***

**YES, STEEL CAN BE SEXY**

- Albina Co., Inc. works with all forms of structural steel (e.g.-angle, wide flange and I-beam, channel, square and rectangular tubing, extrusion, rail and bar), as well as virtually any other ferrous or non-ferrous metals.
- Never shy away from a project that has difficult curved members because you are unsure who will be able to meet your expectations. Albina is always up to the challenge. By teaming with Albina on your next architectural project, you will be rewarded with bends that consistently meet or exceed your expectations.
- We will help you create that signature, eye-catching, award winning piece that could help differentiate your company.
- We can bend to your AESS (Architecturally Exposed Structural Steel) Requirements!
